Exciting match of the Japanese maple Acer palmatum 'Atropurpureum' with the black Capi Urban smooth decorative pot. The leaves of the Japanese maple change colour throughout the seasons, from light green to dark red. The hardy shrub does not require pruning. If you want to prune anyway, do it in late summer or early autumn.

This illustrated manual describes and discusses the unusually rich and varied flora of the Carolinas, from the semi-tropical coast of South Carolina to the northern forests of the high North Carolina mountains. The manual treats in detail and in a concise format more than 3, 200 species of trees, shrubs, vines, herbs and ferns that grow without cultivation in this two-state area. Special features include diagnostic illustrations, keys for identification, detailed descriptions, flowering and fruiting dates, habitat data, distribution data, and pertinent synonymy for each species. County dot maps show the distribution of each species if found in more than five counties throughout the two-state area, and general ranges beyond our borders are given in the text. First published in 1968, Manual of the Vascular Flora of the Carolinas is an established reference for professionals, students, and plant enthusiasts throughout the

Southeastern United States. It is based on the collection and examination of more than 200,000 live specimens. Many of these specimens are now housed in the herbarium at the University of North Carolina at Chapel Hill

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Field guide covering 14 species of "underwater vascular plants known as submerged aquatic vegetation (SAV) or, as they are referred to locally, "bay grasses"." It also describes 2 species of floating aquatic plants and 2 species of algae that may be misidentified as SAV species. The guide "is intended as a tool for natural resource managers and biologists involved with SAV protection and research," and for students, amateur naturalists, and those interested in Chesapeake Bay ecology.

Special edition of the Federal register.

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. *Stand Firm: Apologetics and the Brilliance of the Gospel* argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.
