This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.

Available electronically in an open-access, full-text edition from the Texas A&M University Libraries' Digital Repository at <http://hdl.handle.net/1969.1/146844>. Frank N. McMillan Jr., a country boy steeped in the traditional culture of rural Texas, was summoned to a life-long quest for meaning by a dream lion he met in the night. On his journey, he followed the lead of the founder of analytical psychology, Carl Jung, and eventually established the world's first professorship to advance the study of that field. McMillan, born and raised on a ranch near Calvert, was an Aggie through and through, with degrees in geology and petroleum engineering. As an adult working near Bay City, Texas, he was lunching in a country café when by chance he met abstract expressionist painter Forrest Bess, who was ecstatically waving a letter he had received from Jung himself. The artist's enthusiastic description of Jung as a master psychologist, soul doctor, and healer led McMillan to the Jung Center in Houston, where he began reading Jung's Collected Works. McMillan frequently said, "Jung saved my life." Finding Jung: Frank N. McMillan Jr., a Life in Quest of the Lion captures McMillan's journey through the words of his own journals and through reflections by his son, Frank III. David Rosen, the holder of the first endowed McMillan professorship at Texas A&M University, adds insights to the book, and the late Sir Laurens van der Post, whom the elder McMillan met at the Houston Jung Center in 1979, authored a foreword to the book before his death. This is a story that sheds light on the inner workings of the self as well as the Jungian understanding of the Self. In often lyrical language, it gives the human background to a major undertaking in the dissemination of Jungian scholarship and provides a personal account of a life lived in near-mythic dimensions.

The combination of portrait statue, monumental support, and public lettering was considered emblematic of Roman public space even in antiquity. This

book examines ancient Roman statues and their bases, tombs, dedicatory altars, and panels commemorating gifts of civic beneficence made by the Augustales, civic groups composed primarily of wealthy ex-slaves. Margaret L. Laird examines how these monuments functioned as protagonists in their built and social environments by focusing on archaeologically attested commissions made by the Augustales in Roman Italian towns. Integrating methodologies from art history, architectural history, social history, and epigraphy with archaeological and sociological theories of community, she considers how dedications and their accompanying inscriptions created webs of association and transformed places of display into sites of local history. Understanding how these objects functioned in ancient cities, the book argues, illuminates how ordinary Romans combined public lettering, honorific portraits, emperor worship, and civic philanthropy to express their communal identities.

Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

The ideal book for people who want to increase their word power. Thorough coverage of 1,200 words and 240 roots while introducing 2,300 words. The *Vocabulary Builder* is organized by Greek and Latin roots for effective study with nearly 250 new words and roots. Includes quizzes after each root discussion to test progress. A great study aid for students preparing to take standardized tests.

The second installment of the graphic novel adaptation of Cassandra Clare's bestselling *The Mortal Instruments!* In the world of shadows, battling vampires and fending off wolves at knifepoint no longer frightens Clary. If it means finding her mother, she can deal with that much. But when a trusted ally betrays the Shadowhunters and Jace is nowhere to be found, she might have to face a truth too unsettling to bear... Cassandra Jean's lavish art brings the second volume to life with gorgeous illustrations of the beloved characters and another never-before-seen interlude penned by Cassandra Clare exclusively for this edition!

This volume explores the science fiction/world politics intertext. Through detailed analyses of such texts as *Blade Runner*, *Stalker*, *Star Trek*, and *Buffy the Vampire Slayer*, the chapters in this volume examine the complex and sometimes contradictory relations between world politics, both as discipline and as practice, and discourses of science fiction. Offering a novel combination of popular culture analysis with major theoretical and empirical issues concerning world politics, *Science Fiction and World Politics* provides insights into the discursive constitution of both science fiction and world politics while highlighting the occasional challenges that the science fiction/world politics intertext launches at our common sense.
