Gateway Load Balancing Protocol (GLBP) is a Cisco proprietary protocol and is a very special protocol because unlike the others, GLBP allows the load balancing of traffic among the

master and standby routers. GLBP is considered a high-end feature and that means most Cisco switches and routers don't support GLBP.

This will only help you pass in 60 days if you do 60 days hard study. You take the full CCNA exam after 60 days or split it in two as the book says. The first 30 days are to set you up ready to take the ICND1 exam and the last 30 days to take the ICND2 exam or the full 60 days to take one exam (CCNA).
