This guideline sets out an antimicrobial prescribing strategy for community-acquired pneumonia. It aims to optimise antibiotic use and reduce antibiotic resistance. During the COVID-19 pandemic: for children and young people, follow the recommendations in this guideline. for adults, follow the recommendations in the COVID-19 rapid guidelines on managing pneumonia in the community and pneumonia in hospital.

admission are likely to be infected by organisms similar to CAP and should be treated as CAP.

Management of Pneumonia - GGC Medicines

Initial treatment is with empirical antibiotics, following national/international guidelines and local epidemiology. In hospital, antibiotics should be administered within 4 hours of presentation. Sputum and blood samples should be sent for culture in people with moderate- or high-severity CAP, ideally before antibiotics are started, and legionella and pneumococcal urine antigen testing should be considered.
