A heterocyclic

# Get Free Heterocyclic

Chemistry  
A compound or ring structure is a cyclic compound that has atoms of at least two different elements as members of its ring(s). Heterocyclic chemistry is the branch of organic chemistry dealing with the synthesis, properties, and applications of these heterocycles..

Heterocyclic

# Get Free Heterocyclic

Chemistry can be divided into heteroaromatic and heteroalicyclic types. In general, the chemistry of heteroalicyclic compounds is similar to that of their aliphatic analogues, but that of heteroaromatic compounds involves additional principles.
