The crucial period of Chinese history, 220-960, falls naturally into contrasting phases. The first phase, also known as that of "early medieval China," is an age of political decentralization. Following the breakup of the Han empire, China was plunged into civil war and fragmentation and stayed divided for nearly four centuries. The second phase started in 589, during the Sui dynasty, when China was once again brought under a single government. Under the Sui, the bureaucracy was revitalized, the military strengthened, and the taxation system reformed. The fall of the Sui in 618 gave way to the even stronger Tang dynasty, which represents an apogee of traditional Chinese civilization. Inheriting all the great institutions developed under the Sui, the Tang made great achievements in poetry, painting, music, and architecture. The An Lushan rebellion, which also took place during Tang rule, brought about far-reaching changes in the socioeconomic, political, and military arenas. What transpired in the second half of the Tang and the ensuing Five Dynasties provided the foundation for the next age of late imperial China. The Historical Dictionary of Medieval China fills an urgent need for a standard reference tailored to the interest of Western academics and readers. The history of medieval China is related through the book's introductory essay, maps, a table of Dynastic Periods, a bibliography, and hundreds of cross-referenced dictionary entries on key people, historical geography, arts, institutions, events, and other important terms.

Medieval Christian Nubia is often a neglected period of medieval African history. Because meaning is determined largely by context this work traces the Greco-Roman, Meroitic and Jewish precursors. The regional, historical and theological schisms within Christianity are also a highlight. The dynamics of the three Nubian kingdoms of Nobatia, Mukurra, and Alwa are the centerpiece of this book that covers mural arts, architecture, and the names of the leading kings and bishops. Another strength of the book is the analysis of the 700-year baqt peace treaty between Christian Nubia and Islamic Egypt; this is considered to be the longest lasting treaty in diplomatic history. The complex transition from Christianity to Islam in the 14th century is analyzed in great personal, political, and military detail. Historical Dictionary of Medieval Christian Nubia contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on politics, economy, foreign relations, religion, and culture of the medieval Nubians. This book is an excellent resource for students, researchers, and anyone wanting to know more about Medieval Christian Nubia.

For more than 200 years the United States and Russia have shared a multi-faceted relationship. Because of the rise of power the two countries enjoyed in the late 19th and through the 20th century, Russian-American relations have dominated much of recent world history. Prior to World War II the two countries had relatively friendly contacts in culture, commerce, and diplomacy, however, as they contested for supremacy during the Cold War relations turned hostile and competitive. With the apparent end of the Cold War with the collapse of the Soviet Union and of communism in 1991, the relationship continues to evolve and the future looks uncertain but promising. The Historical Dictionary of United States-Russian/Soviet Relations identifies the key issues, individuals, and events in the history of U.S.-Russian/Soviet relations and places them in the context of the complex and dynamic regional strategic, political, and economic processes that have fashioned the American relationship with Russia. This is done through a chronology, a bibliography, an introductory essay, and several hundred cross-referenced dictionary entries on key persons, places, events, institutions, and organizations.
