So many companies and brands out there in the market, it will be impossible to stand out without a great name. Just imagine, there are already more than 150,000 companies operating in a small country like Singapore. How will your brand stand out if it doesn't have a great name? Finding a great name is also no longer easy because of the proliferation of companies and brands in our society. Chances are, the name you think of has already been registered and trademarked by someone else. So, what do you do? The 10 Rules Of Naming will show you how to create a powerful brand name in a simple, straightforward and jargon-free manner. Besides explaining the 10 rules of naming in detail, the book also covers the pitfalls of naming to avoid, binding everything together through vivid examples of how companies with great names went about creating those names.

manufacturers of fluid seals on a global basis. We have drawn on the expertise from our existing portfolio, Sealing Technology newsletter and World Pumps magazine to bring you vital information, analyses, forecasts that cannot be found anywhere else. The study deals with items and materials used, very largely, in the mechanical engineering sector, to effect hermetic closures or the separation of fluids. It therefore covers gaskets and packings, O-rings and mechanical and bellows seals. Profile of the International Fluid Sealing Industry covers the structure of the industry, highlighting developments, identifying future trends, and looking at recent mergers and acquisitions in the sector. Market estimates and forecasts to 2008, by region and seal type, are presented along with an analysis of the main end-user markets for fluid seals, as well as a technology overview. Forty leading international fluid sealing manufacturers are profiled. A directory of seal manufacturing companies is also included.
