In this book Dr. Michael Stankosky, founder of the first doctoral program in knowledge management, sets out to provide a rationale and solid research basis for establishing Knowledge Management (KM) as an academic discipline. While it is widely known that Knowledge is the driver of our knowledge economy,

File Type PDF

Management does not yet have the legitimacy that only rigorous

academic research can provide. This book lays out the argument for KM as a separate academic discipline, with its own body of knowledge (theoretical constructs), guiding principles, and professional society. In

creating an academic discipline, there has to be a widely accepted theoretical construct, arrived at by undergoing scholarly scientific investigation and accompanying rigor.

This construct becomes the basis for an academic curriculum, and proven methodologies for practice. Thus, the

bridge theory and  
practice, providing  
guiding principles to  
those embarking on or  
evaluating the merits of  
a KM program. As a
