Includes entries for maps and atlases.

Robinson traces the emergence of a new political elite in the West Bank and Gaza in the 1980s and the grassroots political and social revolution it launched during the Intifada.

In 150 years Italy transformed itself from a poor and backward country into one where living standards are among the highest in the world. In Measuring Wellbeing, Giovanni Vecchi provides an innovative analysis of this change by drawing on family accounts that provide engaging insights into life and are the "micro" data that create the foundations for the "macro" picture of variations and fluctuations in the development of Italy. Vecchi provides a nuanced account of the changes. He emphasizes that the concept of wellbeing is multidimensional and must include non-monetary aspects of life: nutrition, health and education, as well as less tangible elements such as freedom or the possibility to exercise one's political rights. The book deals with this polyhedral nature of wellbeing. Among the insights are that Italians succeeded in combining growth with equity, but that the gap between the North and South did not narrow; the while longevity has increased, education has not improved as much as it could have; and that for close to three decades, Italy's virtuous path has come to a halt: the wellbeing of the Italian people is at the crossroads between progress and decline. Measuring Wellbeing engagingly combines a unique dataset and an innovative statistical method that can be adapted to other countries.

For thousands of years fragrance has been used, across many varied cultures, for altering mental and emotional states, and as part of spiritual practice. This book explores the impact of fragrance on the psyche from biological, anthropological, perfumery and aromatherapy viewpoints. Beginning with an exploration of our olfactory system and a discussion of the language of odour, the book examines the ways in which fragrance can influence our perceptions and experiences. It introduces us to a broad range of fragrance types - woody, resinous, spicy, herbaceous, agrestic, floral and citrus, as well as the attars that form part of Unani Tibb medicine. Traditional and contemporary uses and the mood-enhancing properties of fragrance types are presented. The book then provides an overview of the theoretical and philosophical frameworks that have been used to analyse how and why we choose fragrance. Finally readers are given guidance on how to cultivate their olfactory palate, which reveals a new dimension in the use of fragrance to enhance wellbeing. This book offers a wealth of knowledge on plant aromatics and the powerful influence of fragrance on wellbeing. It will be of particular interest to aromatherapists, perfumers, psychotherapists, ethnobotanists and anthropologists.

With Islamic banking gradually becoming a more influential factor in the West, an analysis of the concept of riba- a definition of which is not given in the Qur'an - is long overdue. This text presents readers with various interpretations of this Islamic economic concept - generally perceived as 'interest'. Thomas provides a framework for understanding ribaby examining: linguistic classical judicial analysis the historical context modern economics. Including contributions from prominent international scholars, the book fills a gap in the existing literature and will be welcomed by academics and professionals with an interest in Islamic studies, economics and legal history.

This book intends to unite studies in different fields related to the development of the relations between logic, law and legal reasoning. Combining historical and philosophical studies on legal reasoning in Civil and Common Law, and on the often neglected Arabic and Talmudic traditions of jurisprudence, this project unites these areas with recent technical developments in computer science. This combination has resulted in renewed interest in deontic logic and logic of norms that stems from the interaction between artificial intelligence and law and their applications to these areas of logic. The book also aims to motivate and launch a more intense interaction between the historical and philosophical work of Arabic, Talmudic and European jurisprudence. The publication discusses new insights in the interaction between logic and law, and more precisely the study of different answers to the question: what role does logic play in legal reasoning? Varying perspectives include that of foundational studies (such as logical principles and frameworks) to applications, and historical perspectives.

The monograph aims at a historical and bibliographical survey of the qur??nic and rational world-view of early Islam, of the period of translations from Greek into Syriac and Arabic, and of the impact of Islamic thought on Europe.
