The NGINX Plus on the AWS Cloud Quick Start deploys four NGINX Plus instances in a scalable active-active load-balancing infrastructure for delivering a sample PHP application. All four instances are running on NGINX Plus Amazon Linux AMIs: two instances each run together with a PHP application server and the other two are HA load balancers.

Announcing the NGINX Plus on AWS Cloud Quick Start

NGINX Plus provides the following Layer 7 features, which are available with ELB in a more limited way or not

balancers: NGINX Plus provides multiple advanced features that ELB and ALB lack.

NGINX Plus Load Balancing for AWS Auto Scaling Groups

NGINX Plus provides consistent, always available, high-performance application delivery and web services within your AWS Elastic Cloud Compute (EC2) environment. NGINX Plus can operate standalone or can integrate with AWS services – such as existing load balancing solutions, Auto Scaling groups, and Lambda – to reduce your application delivery and management costs.
