"Sordid Truths" chronicles the author's ascent from being just another broke college boy to becoming an internationally renowned adult-film superstar.

A life told in one book. What am I writing for? Dear reader, I need to vent, the thoughts flow in a raw way, with no time for embellishments, and no filter for the sordid details. I need to warn you that my story will start innocently. However, do not fool yourself: it'll get worse every chapter, and so, there will be certainly many sordid details. I anticipate that: "In the controversial search for success, I draw my failure reaching for victories". Confusing, right? Accept to know me and you will understand!

Facts are and must be the coin of the realm in a democracy, for government “ of the people, by the people and for the people,” requires and assumes to some extent an informed citizenry. Unfortunately, for citizens in the United States and throughout the world, distinguishing between fact and fiction has always been a formidable challenge, often with real life and death consequences. But now it is more difficult and confusing than ever. The Internet Age makes comment indistinguishable from fact, and erodes authority. It is liberating but annihilating at the same time. For those wielding power, whether in the private or the public sector, the increasingly sophisticated control of information is regarded as utterly essential to achieving success. Internal information is severely limited, including calendars, memoranda, phone logs and emails. History is sculpted by its absence. Often those in power strictly control the flow of information, corroding and corrupting its content, of course, using newspapers, radio, television and other mass means of communication to carefully consolidate their authority and cover their crimes in a thick veneer of fervent racialism or nationalism. And always with the specter of some kind of imminent public threat, what Hannah Arendt called ‘ objective enemies.’ ” An epiphanic, public comment about the Bush “ war on terror ” years was made by an unidentified White House official revealing how information is managed and how the news media and the public itself are regarded by those in power: “ [You journalists live] “ in what we call the reality-based community. [But] that's not the way the world really works anymore. We're an empire now, and when we act, we create our own reality . . . we're history's actors . . . and you, all of you, will be left to just study what we do. ” And yet, as aggressive as the Republican Bush administration was in attempting to define reality, the subsequent, Democratic Obama administration may be more so. Into the battle for truth steps Charles Lewis, a pioneer of journalistic objectivity. His book looks at the various ways in which truth can be manipulated and distorted by governments, corporations, even lone individuals. He shows how truth is often distorted or diminished by delay: truth in time can save terrible erroneous choices. In part a history of communication in America, a cri de coeur for the principles and practice of objective reporting, and a journey into several notably labyrinths of deception, 935 Lies is a valorous search for honesty in an age of casual, sometimes malevolent distortion of the facts.
