**Installing Amplifier and Subwoofer from Start to Finish**

There are a few ways that one can expect to connect a subwoofer to an amplifier, receiver, or processor (also known as a home theater receiver). The most common method is done by connecting the subwoofer to the SUB OUT or LFE output of a receiver/amplifier. But you might also come across a subwoofer that uses stereo RCA or speaker wire connections.

**How to Connect a Subwoofer to a Receiver or Amplifier**

The most basic element of component subwoofer installation is a snap. Mount your component subwoofer to an appropriate enclosure by connecting the leads to the terminal cup, and using mounting screws. It shouldn't take more than a few minutes. You'll then run the wiring to a nearby amplifier. You'll have choices of how you wire your sub.
