In transport economics, the value of time is the opportunity cost of the time that a traveler spends on his/her journey. In essence, this makes it the amount that a traveler would be willing to pay in order to save time, or the amount they would accept as compensation for lost time. One of the main justifications for transport improvements is the amount of time that travelers will save. Using a set of values of time, the economic benefits of a transport project can be quantified in order to comp

An expense is the reduction in value of an asset as it is used to generate revenue. If the underlying asset is to be used over a long period of time, the expense takes the form of depreciation, and is charged ratably over the useful life of the asset. If the expense is for an immediately consumed item, such as a salary, then it is usually charged to expense as incurred.

Getting hospitalized in the U.S. for COVID-19 may cost thousands, researchers say. How much of that you'll pay depends on your insurance.

Accounting rules mandate that the cost of debt should be recorded as an expense, while the cost of equity does not appear in the income statement. Therefore, the amount of financing expense, and thus net income, in the income statements depends on how firms finance their business. Based on a clear, substantial trend of declining leverage since the 1990s, we examine how changes in capital structure might influence earnings attributes—the matching between revenues and expenses. We find that the contemporaneous relation between revenues and interest expense in US firms has decreased from 1972 to 2013, a result of both changes in leverage and the declining explanatory power of interest expense with respect to revenues. When we construct the weighted average costs of capital based on the costs of both debt and equity, we find the contemporaneous relation between revenues and the costs of capital has not significantly changed. Our results indicate that differential accounting treatment of the costs of debt and equity can affect earnings attributes through change in capital structure.

At a time when faculty roles are under great scrutiny and faculty work itself has an uncertain future, this book offers a new approach to examining academic professionalism. This collection of essays applies a philanthropic lens to contemporary debates and considers academic work completed out of a moral responsibility to the public good. It provides a counterpoint to narrow conceptions of appropriate faculty work as limited to the production of credit hours and research dollars and offers evidence that faculty can have a wider role both within and beyond the “ivory tower.” By examining faculty members’ many contributions, not only to students but to society-at-large, *Faculty Work and the Public Good* provides an alternate perspective on America’s colleges and universities that will help preserve and expand professorial contributions to the public good. Although not all faculty are philanthropically inclined, highlighting those who are will help preserve valuable aspects of faculty work and encourage more such contributions to society. This volume is an essential read for higher education policymakers, trustees, and administrators; students and scholars of higher education and philanthropy; and individual faculty concerned about their profession. Contributors: Ann E. Austin, J. Herman Blake, Dwight F. Burlingame, Denise Mott DeZolt, Sean Gehrke, Audrey J. Jaeger, Adrianna Kezar, Jia G. Liang, Elizabeth Lynn, Michael Moody, Emily L. Moore, Thomas F. Nelson-Laird, Jason F. Perkins, William M. Plater, Gary Rhoades, R. Eugene Rice, John Saltmarsh, Lorilee R. Sandmann, Paul Shaker, Marty Sulek, William G. Tierney, Richard C. Turner “The contributors to this volume provide unique insights into this under-appreciated but significant dimension of academic work and culture.” —Jack H. Schuster, professor emeritus, education and public policy, senior research fellow, Claremont Graduate University “Provides a powerful rationale for broadening the definition of what are the valued contributions faculty members can make to their institutions, disciplines, and the public at large” —Judith M. Gappa, professor emerita, Purdue University

The Cost of Time follows an unnamed protagonist who flees New Orleans for her home state of Mississippi. Local disorder, parent-child relationships, and entrenched behavioral patterns are explored through the eyes of a single-woman trespassing her way home.

This book constitutes the proceedings of the 11th IFIP WG 10.3 International Conference on Network and Parallel Computing, NPC 2014, held in Ilan, Taiwan, in September 2014. The 42 full papers and 24 poster papers presented were carefully reviewed and selected from 196 submissions. They are organized in topical sections on systems, networks, and architectures, parallel and multi-core technologies, virtualization and cloud computing technologies, applications of parallel and distributed computing, and I/O, file systems, and data management.
