This book discusses the principles, methodologies, and challenges of robotic musicianship through an in-depth review of the work conducted at the Georgia Tech Center for Music Technology (GTCMT), where the concept was first developed. Robotic musicianship is a relatively new research field that focuses on the design and development of intelligent music-making machines. The motivation behind the field is to develop robots that not only generate music, but also collaborate with humans by listening and responding in an expressive and creative manner. This combination of human and machine creativity has the potential to surprise and inspire us to play, listen, compose, and think about music in new ways. The book provides an in-depth view of the robotic platforms designed at the GTCMT Robotic Musicianship Group, including the improvisational robotic percussionists Haile and Shimon, the personal robotic companion Shimi, and a number of wearable robots, such as the Robotic Drumming Prosthesis, The Third Drumming Arm, and the Skywalker Piano Hand. The book discusses numerous research studies based on these platforms in the context of five main principles: Listen like a Human, Play Like a Machine, Be Social, Watch and Learn, and Wear It.

Now back in print, Mrs. Caliban is " totally unforgettable " (The New York Times Book Review) and " something of a miracle " (The New Yorker) In the quiet suburbs, while Dorothy is doing chores and waiting for her husband to come home from work, not in the least anticipating romance, she hears a strange radio announcement about a monster who has just escaped from the Institute for Oceanographic Research... Reviewers have compared Rachel Ingalls ' s Mrs. Caliban to King Kong, Edgar Allan Poe ' s stories, the films of David Lynch, Beauty and the Beast, The Wizard of Oz, E.T., Richard Yates ' s domestic realism, B-horror movies, and the fairy tales of Angela Carter—how such a short novel could contain all of these disparate elements is a testament to its startling and singular charm.

The world's most renowned critical theorist—who defined the field of postcolonial studies—has radically reoriented her thinking. Finding the neat polarities of tradition and modernity, colonial and postcolonial, no longer sufficient, she argues that aesthetic education is the last available instrument for implementing global justice and democracy.

Draws on firsthand testimonies and recovered court transcripts to present a scholarly account of the 1955 lynching of Emmett Till and its role in launching the civil rights movement.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

In this book the authors develop a theory of free noncommutative functions, in both algebraic and analytic settings. Such functions are defined as mappings from square matrices of all sizes over a module (in particular, a vector space) to square matrices over another module, which respect the size, direct sums, and similarities of matrices. Examples include, but are not limited to, noncommutative polynomials, power series, and rational expressions. Motivation and inspiration for using the theory of free noncommutative functions often comes from free probability. An important application area is "dimensionless" matrix inequalities; these arise, e.g., in various optimization problems of system engineering. Among other related areas are those of polynomial identities in rings, formal languages and finite automata, quasideterminants, noncommutative symmetric functions, operator spaces and operator algebras, and quantum control.

At age 16, in late 1991, Noble Marara joined the Rwandan Patriotic Front (RPF) that was fighting the army of the Rwandan government. RPF was an armed rebellion movement that were composed by mostly Rwandan refugees who lived in Uganda.Throughout his time with RPF, Noble Marara worked closely with the RPF commander, who eventually became the president of Rwanda, General Paul Kagame.In this book Marara shares his experience in working in Kagame close protection team for 8 years and reveal the widely unknown or misunderstood character of the man that has been hidden behind his presidential curtain.Marara lives in exile in UK and he is currently a mental health professional.

Once upon a time, a spell went awry and Make Believe characters were cast into the ordinary world. And the results aren't always happily ever after. . . . Everyone thinks fairy godmothers can do no wrong. But if not for a certain spell mis-cast by Lavender Seelie, Cinderella's former fairy godmother, the Tales would not be stuck in the Here and Now. Fortunately for Lavender, she's about to get a second chance at a happy ending. . . . The Refuge, a sanctuary for wayward Tales, seems like the perfect place for Lavender to start a new life—especially when she discovers an unexpected ally in Seth, the brooding werewolf who's been typecast as a villain ever since his run in with Little Red Riding Hood. But when humans from nearby towns start turning up dead, their bodies mutilated with archaic Tale symbols, Lavender wonders if Seth's deep sensuality has blinded her to the truth. And that distraction could put innocent lives in danger. Including her own. . . . It's not often that something totally new and entertaining comes along, but Kate SeRine doesn't disappoint with Red. I definitely recommend this to readers who want humor, drama, suspense, and a truly entertaining, "feel good" romance. —Kate Douglas
